Jim/Lou: the meeting with the City of Phoenix went reasonably well. We were introduced to the Associate Aviation Manager who had been briefed on our need to install the pipeline on airport property by Cynthia Parker. At first he was not particularly interested in allowing the pipeline but seemed to come off that position as we made our presentation to him. It seems that the airport has no real objection to the pipeline but is more concerned about any liabilities it may assume by allowing this "off-site" water to be brought onto the airport property.

The bottom line is that the City of Phoenix will be sending the existing access agreement that exists between Goodyear and the City to outside counsel who will look over the liability issue. It is hard to believe that this issue is not already effectively addressed by the existing agreement. I think that this will be relatively easily handled but I am an eternal optimist. The City of Phoenix knows that time is of the essence and has committed to quickly reviewing this matter. I will keep you advised.

Gordon Stephenson has told me that the new mayor of the City of Goodyear is possibly interested in some type of community meeting to discuss TCE issues, groundwater and the city water supply system. Can you provide any details. If this were to happen, I assume that I would need to be present? Please advise.

The drilling of E-102 has begun as of today (May 23). We have not heard anything from the Peacock group. My group is scheduled to conference on Friday regarding this matter and we will advise you as to the situation following our teleconference. I thank you both for being present at the Peacock meeting - I believe your presence was important and helpful.

Please let me know if there is anything developing that I need to be aware of. As always, Goodyear is concerned about the negative issues associated with the PGA North site becoming a "problem" for our well managed clean-up.

Hi Jeff;

Thanks for the update. Did the meeting with the City of Phoenix go well? I am trying to keep our counsel up to speed in case any support is needed. Thanks.

Jim

Subject: Old Goodyear Farms  
Irrigation Well

This morning I was able to contact the owner of the property on which the old Goodyear Farms irrigation well (well 9-B) is located. The owner of the property is listed as the Lichfield Road 26 Limited Partnership. We were able to determine that a Mr. Lloyd Levinsky is the managing partner. I contacted Mr. Levinsky this morning and he was friendly and interested in granting access to do the well abandonment. He was not aware of the presence of the old well on the property. He asked that Goodyear prepare a letter to him explaining why we need access and how the work would be conducted. I will prepare a letter to Mr. Levinsky which will be sent out next week. You will be copied on the correspondence. Based on this initial discussion, I am not anticipating that I will need your assistance with getting access but will keep you advised. I am hopeful that we will be able to abandon the well within the next 2 months.
